July 2023 CSE 316 Offline Assignment on

Assembly Language Programming

Problem 1: Sahil has a supply of n chocolates. He eats them one by one, keeping all the wrappers. If he gathers $k > 1$ wrappers, he can exchange them for a new chocolate. How many chocolates can Sahil have in total?

You should take two integer numbers separated by space giving the values of n ($0 < n < 65535$) and k ($0 < k < n < 65535$) as you input.

Provided below are examples of sample input and the corresponding output:

Input	Output
4 3	5
10 3	14
100 5	124

Problem 2: Given an integer n ($0 < n < 65535$), you need to find the sum of its digits. Remember you **must use recursion to calculate the digit sum.**

You should take an integer number separated by space giving the values of n as your input

Input	Output
143	8
5054	14
221	5
